Professional Summary

Front End Developer with 3+ years of experience, with strong knowledge in JavaScript, TypeScript and React.js. I have been improving my knowledge in Node.js, Next.js and PostgreSQL. Having code quality and performance in mind, I have the skills and knowledge to create complex user interfaces using new javascript features and frameworks, create/consume APIs following best practices and tools (REST/GraphQL) and design patterns. Ensure application quality with unit and E2E tests. Committed to continuous learning and staying up to date with the latest industry trends and technologies.

Professional Experience

- **Junior Software Engineer**
INTELIE by Viasat - Rio de Janeiro, RJ
September 2021 – Present

I have been developing and optimizing dashboards for the KPI Performance team, focusing on the Oil & Gas industry. These dashboards handle time series events and can be fully dynamically built according to user needs, such as Grafana. Events come from O&G platforms, energy platforms and vehicles.

Roles and Responsibilities:

- Work as a front-end developer on tasks to dynamically build dashboards/resources to show real-time/historical data
- Perform code reviews and ensure best practices in front-end development
- Write unit tests using JUnit and Jest and perform end-to-end (E2E) testing with Selenium.
- Help team members evolve technically

Key Technologies: React.js, TypeScript, JavaScript, Styled Components, Jest, Highcharts and Java.

Education

- **Graduate Degree in Analysis and Systems Development**
Faculdade de Tecnologia do Estado de São Paulo (FATEC), Botucatu, SP
August 2019 – December 2022
